

What is SCIO?

The SCIO (Scientific Consciousness Interface Operations System) is a universal electrophysiological biofeedback system. It coordinates a complex electro-modal, biofeedback program with computer software in order to gather bioenergetic information of a client's subconscious.

The information is gathered from the body through electrodes in head and limb straps providing an accurate and precise picture of the client's general status. This information is selected and listed by the SCIO in order of the highest reaction and the stressors are analyzed in the course of a stress management session.

The SCIO measures volts, amps, skin resistance, oscillations and virtual or mathematical calculations of the data. It is able to input a voltammetric signature and measure the reaction. This is designed for use as biofeedback for stress reduction.

Science has shown us that your body is indeed electric; therefore electrical reactivity in your body can be measured via responses to impedance, amperage, voltage, capacitance, inductance and frequencies.

The device measures sixteen standard electrical parameters of your body beyond just simple resistance. This makes the SCIO unique. Most standard point and probe devices (e.g., Volt Meters) only measure resistance. Trivector resonant frequencies (a mathematical calculation of the relationship between voltage, amperage and resistance) of substances are compared to your trivector resonant frequencies. This results in the SCIO being the best energetic medicine analysis possible.

Over 60 million bits of information

The SCIO interfaces by limb and head contact straps to you for a highly accurate bio-energetic field evaluation. During testing, it resonates with thousands of tissues, organs, nutrients, toxins and allergens for one hundredth of a second each, and records the degree to which your body reacts.

It processes over 60 million bits of data; and, in about three minutes, the SCIO records your body's reactivity to 9000 parameters of health at 1/100 of a second and distributes this information to over 200 programs.

The SCIO tests your unconscious mind, which has extensive knowledge of you (approximately 97% of what goes on within your mind and body) to retrain, remove and restructure your whole health. You can choose from a wide variety of therapies...

SCIO is ideal for children

The SCIO is ideally suited to children, as they are often unable to verbally communicate what they are suffering from. Children suffering from behavioral problems have seen considerable improvements, as the EPMX / SCIO unearthed contributing factors, such as food intolerance.
